

## SUMMARY

Full-time Project Engineer managing structural foundation pours on the LA Convention Center expansion while authoring and deploying AI solutions to improve project efficiency.

## EXPERIENCE

### Webcor Craft, Project Engineer — Los Angeles, CA

2025 – Present

- Manage **structural foundations** on the **LA Convention Center**— coordinating concrete operations, embeds, takeoffs, and pour logistics from layout through placement.
- Proficient across core project-engineering workflows: **RFIs, submittals**, takeoffs, budgets, and look-ahead scheduling.
- Built an **AI in Construction Suite**, a set of AI tools for the PM and field team that saves every project engineer over a day each week through tool tracking, reporting, and centralized workflows.
- Led the evaluation of an external AI vendor and recommended against adoption saving \$75,000.

### Clune Construction Company, Project Management Intern — San Francisco Bay Area, CA

June 2024 – August 2024

- Processed submittals and wrote RFIs on the Winston & Strawn SF office interior remodel, tracking work from demolition through framing and drywall.
- Performed bid leveling between subcontractors (tile and framing scopes) on the four-story Skadden Palo Alto ground-up office, including direct subcontractor coordination and job walks.
- Observed project closeout at a Menlo Park fertility center; conducted AI research on practical construction applications.

### Cal Poly Pomona Formula E, Nuts & Bolts Lead — Pomona, CA

September 2022 – June 2024

- Led design of a double wishbone suspension and other mechanical elements — for a competition electric vehicle.

### K-12 STEM Center USA, Discover STEM Instructor (Part-time) — Claremont, CA

October 2022 – March 2026

- Taught robotics, Arduino, coding, and soldering to K-12 students; built and deployed an introductory AI course.

## PROJECTS

### Integrating AI in Construction

2024 – Present

- Built and deployed to a live project team, with tools for live **pour tracking**, **embed installation tracking**, **tool inventory**, daily **attendance sign-in**, **look-ahead scheduling**, and concrete **cylinder break tracking**.
- Spearheaded a research project on practical AI adoption in construction, interviewing 30+ industry professionals across California and Las Vegas on different jobsite from senior VPs to interns to map workflows where AI could truly improve.

### FIRST Robotics Competition — California

November 2018 – June 2021

- Designed and built wooden arm for competition robot on a multidisciplinary team; secured funding through grants and created chairman presentation content.

## SKILLS

Quantity Takeoff, RFIs, submittals, Project Management, Software Development, Schedule Procurement, Field Communication.

## SOFTWARE

Python, JavaScript, Java / JavaFX, C#, MATLAB, VBA; LLM integration (Anthropic, OpenAI, Gemini), Firebase, Google Apps Script, React, Three.js; SolidWorks, Autodesk Fusion 360, Bluebeam Revu, Microsoft Office, Google Workspace.

## EDUCATION

### California State Polytechnic University, Pomona

B.S. Mechanical Engineering  
Graduated Fall 2025

## LANGUAGES

Fluent in Mandarin & English; conversational Cantonese.

## INTERESTS

Robotics, applied AI, building (software & hardware), construction, photography & videography (drone, gimbal, DSLR).
